DETAILED ACTION

Allowable Subject Matter

Claims 1-3 and 5-10 are allowed.

The following is an examiner's statement of reasons for allowance:

1. As for claim 1, the prior art does not teach or fairly suggest the use of a camera with a luminance correction section coupled to the output of the image sensing element and operative on individual units of raw colors in pixels, wherein each pixel is formed from a set of unit colors, and wherein the luminance correction section has a first correction control section for sequentially generating a luminance correction amount corresponding to each pixel from a plurality of first correction coefficients, a second correction control section for sequentially generating a luminance correction amount corresponding to each pixel from a plurality of second correction coefficients, and a luminance correction amplification section for setting a synthesized gain as a product of the first and second correction coefficients to amplify the input image signal by the synthesized gain in order to output a new image signal.
2. As for claim 9, the prior art does not teach or fairly suggest the use of a camera with a luminance correction section coupled to the output of the image sensing element and operative on individual units of raw colors in pixels, wherein each pixel is formed from a set of predetermined unit colors, and wherein the luminance correction section generates correction coefficients for each predetermined unit color from a plurality of correction coefficients, wherein the plurality of correction coefficients are formed from axial luminance correction amounts representing two correction distribution

characteristics changing in axial directions of two coordinate axes, and said luminance correction section refers to corresponding axial luminance correction amounts and sequentially generates and uses products of two obtained axial luminance correction values as the luminance correction amounts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
